PROFILE

Integrated MCA student at SJCET, Palai, building web and AI systems. Contribute to the PRAX professional learning platform and develop practical projects in geospatial machine learning, API security, and frontend engineering.

EXPERIENCE

Platform Contributor | PRAX · Vantcrest Labs Pvt. Ltd. 2026–present

- Contribute to PRAX, an invite-only professional learning initiative by Vantcrest Labs Pvt. Ltd., with platform work covering member progression, project challenges, mentorship, and experience documentation.
- Help shape community workflows that connect practical engineering projects, peer feedback, and career opportunities.

SELECTED PROJECTS

UHI — Urban Heat Intelligence github.com/j33v4nz/visat

- Co-developed a Kochi heat action planner for HackMe'26 using Landsat/Sentinel data and physics-informed XGBoost; reported spatial cross-validation R^2 of 0.83 over 54,168 grid cells.
- Built Streamlit planning tools spanning 74 wards, including cooling budget scenarios, development screening, and heat exposure views.

NeuroBots — Zero Trust API Defense github.com/mlwn4096/NeuroBots

- Built an API authorization defense project for BOLA/BFLA scenarios using behavioral analysis, NetworkX graphs, Markov models, and LangChain-assisted threat summaries.
- Used React, FastAPI, Redis, PostgreSQL, and Docker across the interface, API gateway, data layer, and local deployment workflow.

Personal Developer Portfolio mlwn.in

- Built a responsive portfolio with an interactive CLI, Node.js/Express API, downloadable resume, and accessible project presentation.

EDUCATION

Integrated Master of Computer Applications 2025–2030 (expected)

St. Joseph's College of Engineering and Technology (SJCET), Palai

TECHNICAL SKILLS

Languages & web: Python, JavaScript, HTML, CSS, React, Node.js, Express, FastAPI, Streamlit

Data & tooling: XGBoost, PostgreSQL, Redis, Docker, Git, Bash, Linux, NetworkX

Focus areas: Geospatial ML, API security, AI-assisted workflows, responsive UI

ACTIVITIES & RECOGNITION

- HackMe'26 AI/ML track, VISAT Engineering College (September 2026): co-developed UHI for urban heat mitigation.
- Best Team Award, INSENIUM 10.0 Startup Bootcamp (2025); member of a six-person team.
- Participated in Gnosis AI Hackathon at INCEPTA 2026 and HashItUp 24-hour National Hackathon (2025); attended an IBM watsonx Orchestrate workshop (2026).
